

Scope of Work — Erik Madison Bray

This role includes:

- Monitoring the astropy issue tracker
- Adding labels to new issues
- Providing a friendly welcome message on issues and pull requests
- Giving starting pointers for how to resolve the issue or move the pull request forward
- Helping to close out issues and PRs
- Helping with rebasing
- Troubleshooting failing tests
- Improving the documentation for developers
- Improving the infrastructure of the project
- Other core development work and contributions to Astropy Project community infrastructure on an as needed basis and as approved by the Astropy Coordination Committee.

Contractor will join telecons as appropriate with the infrastructure team and Learn Astropy team.
